

What is the “Career Academy”?

The Career Academy is a **new online self-study package** for young scientists based on **six popular courses** from The Scientist Coach. Now in an online format for **flexible and self-directed learning!** The courses cover the **entire career planning process** - from the basic questions “Who am I, what can I do, what do I want?” to specific application and interview preparation (see page 2 for details).

Additionally included in the offer:

- Careers outside academic research - A collection of real-world examples
- Interviews with employers & experts (from 2024)
- Optional: Q&A calls, topic-related webinars & individual consultations

Further information:

- Course languages: English / German
- Participants receive access to the online course platform for 36 months.
- Individual licenses or annual contingents can be booked.
- Please contact: Dr. Iris Köhler, info@thescientistcoach.de

Career Academy Course Program

Discover Career & Life Goals

Knowing your values, interests and goals is the basis for career planning. This course encourages participants to engage in serious self-reflection to understand themselves and their goals better and gain clarity and direction for their future career path.

Develop your Competency Profile

Young scientists often struggle with naming and explaining their competencies. In this course participants analyze their competencies through a systematic process and identify their strengths to create a compelling competency profile.

Career Exploration & The Job Market

With so many options available, young scientists are often unsure which career paths would be a good fit. This course offers guidance and practical tools to help navigate the job market and also showcases popular careers.

Networking & LinkedIn

In today's job market, networking and being visible on professional social networking platforms is essential for advancing ones career. This course provides skills and knowledge to build professional relationships – offline and online.

Job Applications & Interviewing

Young scientists often lack experience with the job application and interviewing process and are unsure how to deal with typical job interview questions. This course covers best-practices of preparing tailored application materials and gives tips on how to ace the job interview..

Staying relaxed during the Job Search

Job searching can be a stressful endeavor: It is time-consuming, requires a lot of effort and rejections may cause frustration and anxiety. This course provides practical tips and techniques for managing stress during the job search process and staying focused and confident .
